

Jitsi Meet for Friends & Family to Virtually Visit Patients

Quick Reference Card For Computer or Laptop

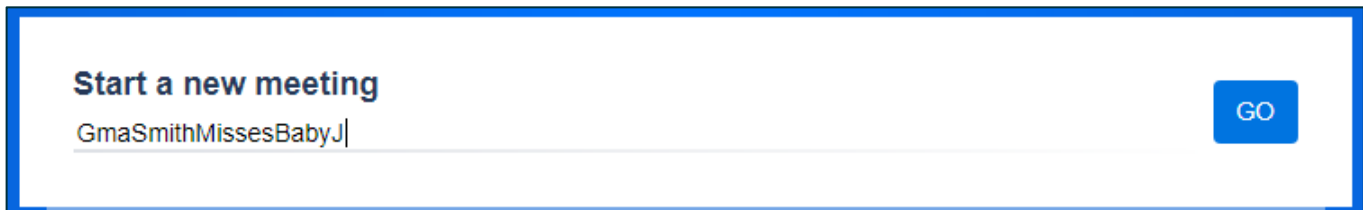

What is Jitsi Meet?

Jitsi Meet is a great way to communicate with your friends and family using video using your personal device, including phone, computer, or laptop. Follow the instructions below to get started.

NOTE: Patients in the hospital can use their own smart device or a tablet (iPad) provided by Monument Health.

Connect Through Jitsi Meet on Your Computer or Laptop

1. Open an internet browser and go to the Jitsi Meet website: <https://meet.jit.si/>
NOTE: Chrome, Edge or Safari are supported browsers. Internet Explorer is not a supported browser.
2. Type a room name in the **Start a new meeting** box. You can enter the name of an already created room you want to join, or you can make up a name and invite your family to join using the same room name. It is recommended to use a unique meeting name to reduce the risk of someone uninvited joining. **Make sure the name has no spaces.** Click **Go**.

3. Click **Allow** when/if you are prompted for Jitsi Meet to access the camera and microphone.
4. The room video chat will open. It is also recommended to add a meeting password to reduce the risk of someone uninvited joining. To add a meeting password:
 - a. Click on the **shield icon** to open the security options.

- b. Click **Add password**.

You can add a passcode to your meeting. Participants will need to provide the passcode before they are allowed to join the meeting.

Password: None

Add password

- c. Type in a **password** you want to use. Click **Add**.
