

# Fellow Health Care Provider

Monument Health Children's is staffed by Society of Pediatric Sedation members who adhere to nationwide best practices. With a pediatrics-focused and family-centered approach, we are equipped for all sedation levels, from anxiolysis, to deep- or monitored-anesthesia care, (emergency same-day sedation intermittently available) based on patient/procedure needs. Our goal is minimal wait time with reduced medical trauma, even with IV starts.

**Please consider referring your pediatric patients to us who require sedation for outpatient procedures such as:**

- EEG
- ABR
- Injections
- Imaging studies
- ECHO
- Chemotherapy
- Lab draws
- Infusions

Thank you for choosing Monument Health Children's as a trusted care partner. We appreciate the opportunity to support you in caring for your patients.

With regards,  
Pediatric Sedation Team  
Monument Health Children's at Rapid City Hospital
